

POLEMAR has been a major manufacturer of pollution management products for over 15 years. We make every effort to ensure that the products we manufacture exceed our customer's requirements and expectations for outstanding quality and ease of use at a competitive price

POLEMAR has taken what we have learned about manufacturing Oil Spill Containment Products and created a product for smaller more controlled environments.

We are therefore pleased to introduce the...

POLEMAR POL-E-BERM

The **POLEMAR** Pol-E-Berm is a quick and easy solution for spill containment. It can be used under any liquid storage device or equipment that could potentially leak harmful fluids.

- **Compact for easy storage**
- **Range of custom built sizes**
- **Range of chemical resistant material.**
- **Prevents environmental damage**
- **Reduced cleanup costs**

Advantages of the POLEMAR Pol-E-Berm

The POLEMAR Pol-E-Berm can be supplied with or without polyethylene foam for the sidewalls or the customer can use their own sidewall material.

The POLEMAR Pol-E-Berm is designed for easy storage and is available in custom sizes. The compact design makes it easy for transport in the field.

The POLEMAR Pol-E-Berm reduces the risk of environmental damage and contamination. Clean up costs can be greatly reduced as well.

The POLEMAR Pol-E-Berm can be constructed from 22oz PVC, XR-5 material or Polyurethane.

PVC offers excellent resistance to oils, fuels and is UV resistant.

XR-5 exhibits high puncture strength and tear resistance. XR-5 also provides a broad range of service in various temperatures and provides excellent chemical resistance.

Polyurethane fabric has increased puncture and abrasion resistance. It provides excellent resistance to petroleum products. Polyurethane also maintains good elasticity over the life of the product

The POLEMAR Pol-E-Berm is available directly from POL-E-MAR Inc.
